

Sprint – Floor cleaning

SPRINT

Sprint is the versatile flat mop system for almost all application areas. Its low holder weight, its outstanding glide properties in combination with different covers and its ergonomically convincing telescopic handle make the Sprint a reliable and flexible alternative for users of every height. Sprint stands for labour-saving and hygienic work with optimum surface coverage and outstanding cleaning results. All this is provided by the convenient and easy-to-operate flat mop system with the multifunctional Sprint holder and patented foot button in two different sizes.

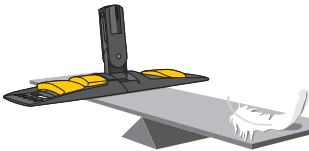

Flat mop systems, simple and convenient to use, with a large selection of mops and accessories.

Sprint – Floor cleaning

Sprint Plus

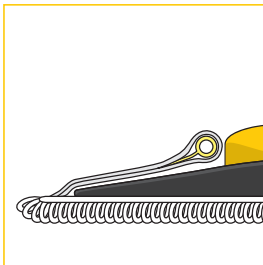

With the Sprint Plus system, you can wring out your mop without removing it from the holder. "No-touch" and therefore particularly hygienic. In addition to the conventional pockets, the Sprint Plus mop comes with a strap which is inserted into the matching Sprint Plus holder.

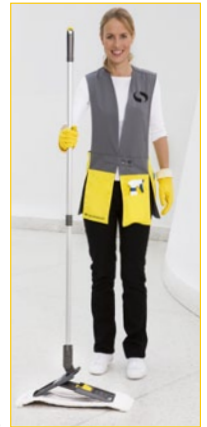

With its low weight, the Sprint Plus holder makes the daily work routine easier.

For initial cleaning to remove loose dirt, the fleece cloth can be wrapped loosely around the holder and held in place with the clips.

Each mop pocket has the patented stay, guaranteeing that the holder slips easily into the cover even after the mop has been washed.

With the Sprint holder, the mop can be attached comfortably and without bending.

The opening on the upper side of the Sprint plus holder allows the dosed cleaning agent to be poured directly onto the mop when using the sprinkling method.

Thanks to the patented foot button, the Sprint holder can be opened and closed with ease.

Cut outer fringes are recommended for very rough surfaces and skirting boards.

Looped fringes are ideal for lifting dirt.
